

Hemorrhoid Symptoms-How To Detect The Symptoms Of Hemorrhoids Early

Hemorrhoids usually present initially with bright red bleeding with the anus, the blood may well stain the toilet paper used in wiping following defecation or it might form streaks of blood on the stools handed during defecation. Other signs that show up later include itching, passage of mucus and the development of painful swelling around the anus area. Some other individuals do not show up with any symptom. - Although at first I thought that hemorrhoids were mainly a disease of girls I later found out that hemorrhoids are common in both men and women.
- About half of the population will be afflicted at one or the other with this disease by the time they are 50 years old.
- Even though most victims are too embarrassed to talk openly about their condition they all wish to find a means of getting quick permanent cure.
- Regrettably, most people just suffer in silence and hope that the signs go away.

The doctor may first of all perform an electronic examination of your anus in order to check for any swelling, then the doctor will make use of an instrument referred to as the proctoscope which is passed into the anal canal to visualize the inside of the anal canal properly.

“

Choosing The Right Type Hemorrhoids Surgery Hemorrhoids are not truly medically alarming per se but is socially distressing. But like any other non-urgent disease, it poses a danger when in the advanced stage or severe. This particular typically requires hemorrhoids surgical treatment for a...

Can you believe, it took me 2 years to go to the doctor to get diagnosed, I am ashamed to admit it, but I just kept hoping that the pain, itching and swelling would just one day just disappear. Talk about being in denial!! Well I got scared and did finally go to the doctor for a through evaluation and proper diagnosis. The doctor performed a digital rectal exam to look for swollen blood vessels that would indicate I had hemorrhoids. The doctor also passed a proctoscope into my anus to visualize the hemorrhoid swelling better.

Not my most comfortable exam, but it is important to have a doctor's exam anytime there is bleeding from the rectum, or there is blood in your stools. I should have not waited so long to go to the doctor. I am lucky it had been just hemorrhoids.

How can You Avoid Hemorrhoids?

The number one way to prevent hemorrhoids is in order to avoid constipation. You must keep your stools soft so they pass easily, so there is no pressure or straining. This means you have to take in a lot more water and fluids, it is recommended that you take in at least 8 bottles of water every day. Also empty your bowels as soon as possible after the urge occurs. Also EXERCISE! Do not just live a sedentary lifestyle, become more active, start walking and running every day. Increase fiber in your diet to help reduce constipation. Shop around for a healthier diet as well as eat less junk food. Click here to learn more about the right hemorrhoid eating habits and the most effective exercises which are needed for proper hemorrhoid cure.

Just remember that early diagnosis and treatment is the best way to get over hemorrhoids, so if you are having symptoms that suggest hemorrhoids go to your doctor for proper analysis and start remedy right away.
